

## Michael J L Turner MA FBCS CITP MAE FEWI

Michael J L Turner is an experienced forensic computer examiner and an established expert witness on computer evidence who has acted in well over 200 cases.

A forensic computer examination is an investigation that:

- complies with established computer forensic principles
- uses appropriate computer forensic techniques
- identifies data relevant to a case and
- produces exhibits for the court

Independent expert evidence helps the court to assess whether data from a computer system used as evidence is:

- original, authentic, accurate and or complete
- corroborated by other computer evidence
- correctly interpreted and
- reliable as evidence

## Experience in Court
